David Yu

39 Jade Ct #3
Novato, CA 94945
lewen.yu@gmail.com

Experience

Software Engineer, Visual Concepts, Novato, CA — June 2013 - present
- Significant work in Edit Player feature and implemented a number of menus in NBA 2K14 for PS4 and Xbox ONE (released Nov 15, 2013).
- Fixed bugs and implemented a pre-order bonus feature in NBA 2K14 for Xbox 360 and PS3 (released Oct 1, 2013)

CS 112 Undergraduate Course Grader, Yale, New Haven, CT — Spring 2013
- Graded problem sets and midterm
- Held office hours to assist students with programming assignments

Software Engineer in Test Intern, Microsoft, Bellevue, WA — Summer 2012
- Implemented UI automation in C#
- Tested and delivered a quality feature of Windows 8 Ads in Apps
- Assisted with integration of new test framework into team workflow

UI Development Consultant, ActualFood, New Haven, CT — Summer 2011
- Prototyped internal front-end in HTML5, CSS, and JavaScript

Skills

Proficient in: C, ActionScript, JavaScript, and Haxe
Comfortable with: C++ 98, C#, Python, Java, Standard ML, Haskell, shell scripting
Design: Flash, Illustrator, Photoshop. Blender

Education

B.S. in Computer Science, Yale University, New Haven, CT — May 2013

- **Thesis**: *On Network Policy Composition and the Maple SDN Controller*
- Advanced Topics in Computer Graphics
- Compilers and Interpreters
- Computer Graphics
- Computer Networks
- Operating Systems

Coursework

LZW: compression/decompression utility using prunable hash-tables
PIOS: distributed, deterministic instructional operating system
Raytracer: with stochastic anti-aliasing and BSP acceleration
TCC: Compiler for the Tiger programming language in Standard ML
TCP Reno: reliable transport and congestion control in Fishnet simulator

Projects

Jumpman: co-operative physics-based platformer in Flash
Poisson: casual game for Windows Phone. Worked on smooth AI steering
Exorcist: unco-operative advengame. Worked on per-pixel parsing and level design.
Qubert: incomplete 3D Q-bert clone in OpenGL with spline-based movement.
F_0: F-Zero-esque prototype in HTML5 with networked multiplayer on Node and WebSocket.

Honors   Sheffield Scholarship (2012)

Objective   To assist in redefining or implementing the next generation of story-driven games. To work on interesting, hard problems on the intersection of mathematics, art, engineering, and computer science.
